ANNUAL LISTING OF FEDERALLY OBLIGATED PROJECTS: FEDERAL FISCAL YEAR 2022

October 1, 2021 – September 30, 2022

Pikes Peak Area
Council of
Governments

Purpose of This Report

On December 4, 2015, President Obama signed into law Public Law 114-94, the Fixing America's Surface Transportation Act (FAST Act), which funded surface transportation program fiscal years (FY) 2016 through 2020. A one-year FAST Act extension through September 30, 2021, was enacted as part of the Continuing Appropriations Act. The Infrastructure Investment and Jobs Act (IIJA) was signed into law by President Joe Biden on November 15, 2021, and funds surface transportation program FY22-26.

To improve transparency of the expenditure of Federal transportation funds, the FAST Act and IIJA requires Metropolitan Planning Organizations (MPOs) to publish an annual list of projects using Federal funds that were obligated during the year. The Federal Highway Administration (FHWA) defines "obligation" as "the federal government's legal commitment to pay or reimburse the States or other entities for the Federal share of a project's eligible costs. Obligated projects were not necessarily initiated or completed during this year. The obligated amounts reflected in this report also may not be equal to the final project cost.

Background

The Pikes Peak Area Council of Governments was designated in April 1977 by the Governor of the State of Colorado as the Metropolitan Planning Organization for the Pikes Peak region, responsible for carrying out the regional transportation planning process. To be eligible for federal funding, roadways need to be functionally classified as an urban collector/rural major collector or any higher-level type of road. PPACG serves as a regional forum for the discussion and coordination of local and regional transportation issues and for the development of transportation policies and programs. As the designated MPO, PPACG is responsible for:

- The 20+-year regional transportation plan (RTP), updated every four or five years,
- The four- to six-year short-term transportation improvement program (TIP), and
- The two-year unified planning work program (UPWP).

Regional Transportation Plan

PPACG is responsible for developing a 20-year minimum RTP. RTPs are required to comply with federal and state laws for regional and statewide planning, in order for the region to be eligible for federal transportation funding. All transportation projects that could significantly alter transportation or air quality within the metropolitan planning area, no matter what the source of funding, must be included in the plan. The primary purpose of the plan is to develop a strategy for the best use of public funds in meeting community goals. The applicable RTP for this document is the 2045 RTP.

Transportation Improvement Program

The TIP is the adopted list of public highway, bicycle, pedestrian, transit, and air quality projects programmed to receive federal and state transportation funds in the next six years. The TIP implements the fiscally constrained portion of the RTP. Projects in the TIP must be consistent with the RTP vision for each corridor, if applicable, before they can be funded. The FY 2022-2025 TIP was approved by the PPACG Board of Directors in August 2021, and the FY 2023-2027 TIP was approved by the PPACG Board of Directors in January 2022. The programmed funds from these TIPs are included in this document.

FHWA Obligation Report

The tables in this report are organized by TIP funding category. The Statewide Transportation Improvement Program (STIP) Identification number, project code number, the Colorado Department of Transportation (CDOT) project description or TIP project description, project sponsor, and the federal obligation amount are shown for each project.

- The TIP Number is the tracking number assigned by PPACG staff for financial management purposes.
- The STIP WBS Number is a work breakdown structure (WBS) identification number assigned to each project selected for inclusion in the TIP and STIP.
- The Project Sponsor is the agency responsible for initiating, managing, and completing the project and, in many if not all cases, for providing matching funds.
- The Federal Obligation is the approved federal portion available during the federal fiscal year.

Some projects may include funds from multiple TIP program categories; thus, one project line under one funding source does not necessarily equal the total obligated funding for that project. In these instances, the same project location description will appear in several funding sections of the project listing.

The projects listed in this report are also included in PPACG's TIP document, which is available at <https://www.ppacg.org/transportation/transportation-improvement-program/>. The following tables below are based on records obtained from CDOT, Federal Transit Administration (FTA), and/or local transit agencies as PPACG does not participate directly in the obligation process.

FTA Obligation Report

The tables in this report are organized by FTA program/project number, recipient, total obligation amount (federal and local), federal obligation amount only, and project description.

- The FTA program/project number is an identification number assigned by FTA to each project selected for inclusion in the TIP and STIP.
- The recipient is the agency responsible for initiating, managing, and completing the project and, in many if not all cases, for providing matching funds.
- The total obligation amount is the approved federal and local portion during the federal fiscal year.
- The federal obligation amount is the approved federal portion obligated during the federal fiscal year.
- The project description includes a summary of the project scope of work.

Some projects may include funds from multiple TIP program categories; thus, one project line under one funding source does not necessarily equal the total obligated funding for that project. In these instances, the same project location description will appear in several funding sections of the project listing.
